Programming Languages and Soft Skills

C++, Java, HTML, CSS, Python, Team Management, Problem Solving, Communication Skills

Academic Projects

Club Registration: E-commerce website for club membership purchase

- Engineered a dynamic e-commerce platform for apparel and merchandise using HTML, CSS and JavaScript.
- Key improvements included a streamlined navigation system and optimized checkout process, reducing cart abandonment rates.
- Implemented responsive design across devices and integrated advanced search functionalities and personalized recommendations.

Expense tracker and Financial Advisor: Dashboard for Expense tracking and AI-Powered Chatbot for Financial Advisory

- Created an AI-powered financial advisor chatbot using Angular and NLP, effectively reducing response times and increasing user engagement worldwide with expense tracker.
- The interactive chatbot provides 24/7 financial advisory support, overcoming limitations like location and scheduling.
- Architected AI-driven chatbot capabilities, boosting customer engagement and achieving a reduction in resolution time, significantly improving overall user experience and operational efficiency.

Extracurricular Activities and Achievements

Navigation Officer - Maersk Line:

Proven track record of finally making it to the interview of Maersk line as a Navigation Officer.

Team Lead - E-commerce Club:

Engaged in the events and club activities: The core member of the ecommerce club in creative and marketing department and organizing successful events.

Team Lead – Startup Club:

Managed and executed 15+ startup club events (e.g., hackathons, speaker panels, workshops), increasing club engagement and led end-to-end event planning (logistics, marketing, budgeting, vendor relations) for major startup initiatives, consistently delivering projects on time and under budget.

Student Council - Discipline Committee at VIT Bhopal:

Ensured smooth conduct of campus activities by maintaining order during events and enforcing institutional code of conduct.
